

Harshada Vichare

PHP Web Developer

github.com/harshada-vichare | harshada.vichare.in@gmail.com | Mumbai, IN | linkedin.com/in/harshada-vichare

PROFESSIONAL OVERVIEW

Detail-oriented Full-Stack Web Developer with 6+ years of experience building and maintaining PHP-based web applications. Proven ability to improve application performance, deliver responsive web solutions, build scalable systems, and handle confidential information with discretion. Recognized for strong problem-solving skills and ability to thrive in fast-paced environments. Open to remote, hybrid, or on-site roles including international opportunities.

WORK EXPERIENCE

FREELANCE WEB DEVELOPER | Remote

JUL 2025 – PRESENT

- Developed custom PHP-based web modules from scratch, including survey and inquiry forms that automatically collected user responses and delivered submitted data to business owners through email workflows.
- Performed PHP version migration and modernization of legacy applications, upgrading systems from PHP 5 to PHP 7, resolving compatibility issues, improving search functionality, and enhancing website performance.
- Exploring Git-based workflows, deployment practices, and modern web development technologies, including React.js, Node.js and MongoDB.

ENTREPRENEURSHIP - SAREE E-COMMERCE & DISTRIBUTION | Mumbai

MAY 2024 – APR 2025

- Independently managed end-to-end business operations including vendor coordination, customer engagement, and order fulfillment.
- Acquired and managed a customer base of 40+ clients through relationship management and personalized service.
- Implemented inventory and financial tracking processes using Excel and Figma-based digital catalogs to improve operational efficiency.

INDEPENDENT CONSULTANT | Remote

AUG 2022 – FEB 2024

- Designed and developed a booking management platform for a hospitality-sector client using Laravel, implementing room reservation workflows, availability tracking, pricing management, and booking administration features.
- Developed backend modules and RESTful API integrations to support reservation processing, booking status management, and real-time availability updates across the platform.
- Implemented search functionality and product categorization features to improve product discovery and navigation across the website.

PHP PROGRAMMER | Growthwell Consulting, Mumbai

FEB 2019 – JUN 2022

- Participated in the complete software development lifecycle for web applications, collaborating with clients and internal teams to understand business workflows, define system requirements, create process diagrams, develop solutions, conduct testing, and provide deployment documentation.
- Developed a customized ERP implementation for a subsidiary business by replicating and extending an existing platform, including lead management, international client management, reporting dashboards, reminder systems, role-based access control, and OTP-based login functionality.
- Resolved responsive design issues across devices, improving mobile usability and reducing client-reported UI defects that led to improved online visibility.

HARSHADA VICHARE

WEB DEVELOPER | Creative Pills, Mumbai

JUN 2018 – DEC 2018

- Contributed to the development of a fitness equipment e-commerce platform using WordPress, custom themes, and plugins, implementing product catalog management, filter-based product search, and dynamic product detail pages displaying specifications, images, and descriptions.
- Developed backend modules for a residential real estate platform using PHP and MySQL, enabling administrators to manage property listings, project information, images, location details, and content visibility through a centralized administration panel.
- Improved website performance through image optimization, lazy loading implementation, and frontend responsiveness enhancements, resulting in faster page loading and improved user experience.

PHP DEVELOPER | Get My Machine, Mumbai

DEC 2017 – MAY 2018

- Enhanced backend administration modules used by internal sales and operations teams to manage equipment listings, buyer requirements, customer inquiries, leads, and order-related data.
- Built a role-based access management module that enabled administrators to control user permissions across different backend modules, implementing form validation, business logic, and MySQL database integration.
- Maintained structured task documentation and progress tracking using Excel, ensuring visibility of development activities and issue resolution.

KEY PROJECTS

1. CRM System

- Role: Lead Developer
- Tech Stack: PHP, JavaScript, HTML, CSS
- The System includes an admin dashboard for managing customers, leads, and products with search, CRUD operations, and a responsive UI. This system includes the following modules: lead and client management, reporting dashboards, reminder systems, role-based access control, and OTP-based login functionality.

2. Real Estate Website

- Role: Frontend Developer
- Tech Stack: React.js, JavaScript, HTML, CSS - SCSS
- Developed a responsive frontend for a real estate booking system. This system includes project listings with location map, search filters, project details with photos and description, and a responsive design accessible across multiple devices. Backend functionality is planned for future phase.
